

# MASTER YOUR CHALLENGES WITH **3 STORY SOFTWARE**

Our vendor management system 3 Story Software combines technological expertise with market knowledge from the recruitment industry. The solution offers everything you need to manage your workforce effectively and enables you to manage and control your suppliers quickly and cost-effectively.

## Challenges when deploying external staff

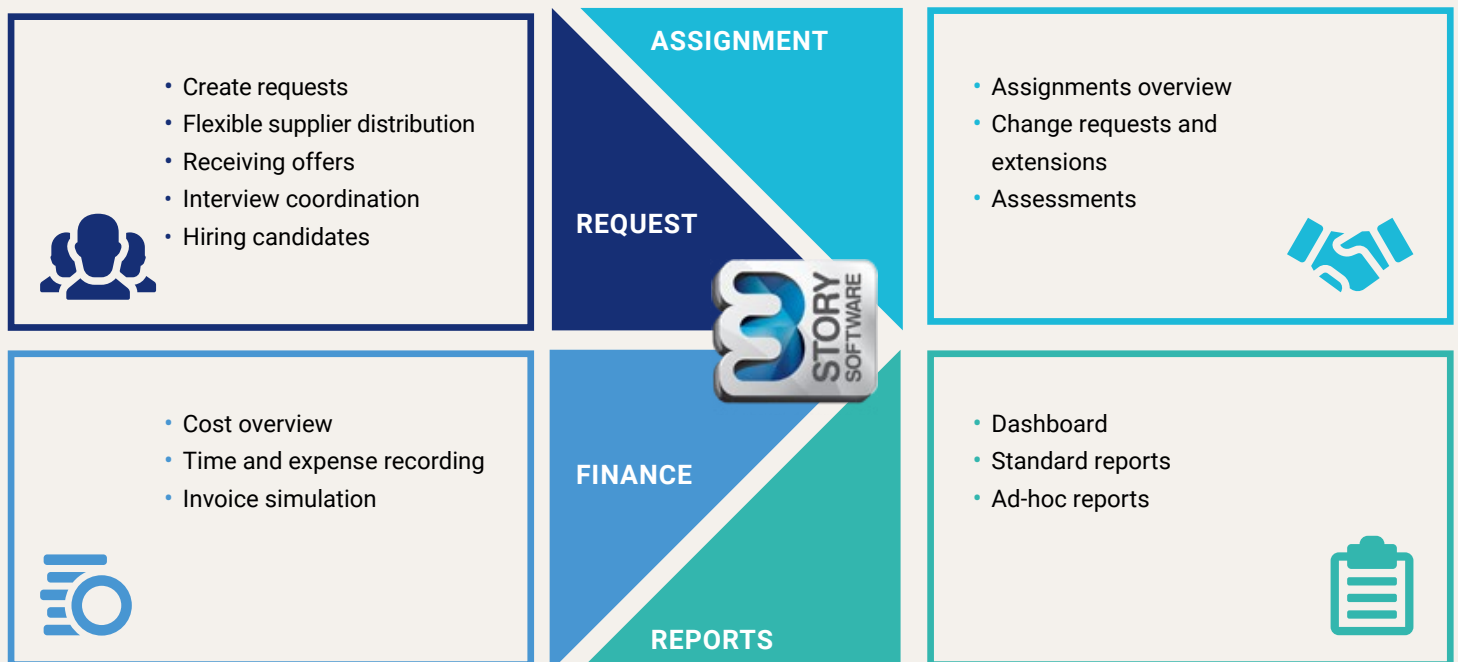

- Different compliance regulations
- Lack of transparency
- Lack of cost control
- High manual efforts regarding procurement, time recording and billing
- Maverick buying
- Resource bottlenecks

## The solution: 3 Story Software

### TRANSPARENCY, COMPLIANCE AND INNOVATIONS

- Contractual management of service contracts, temporary employment contracts and statements of work.
- Adherence to your internal and external compliance regulations.
- Timely and regular update of industry requirements such as equal pay and tariff supplements.
- Transparency and a good overview through individualised reporting and detailed forecasts of resource usage.
- Further development based on customer feedback and innovative product enhancement through agile software development (controlled from the Mannheim location).

### 4 MODULES FOR YOUR SUCCESS

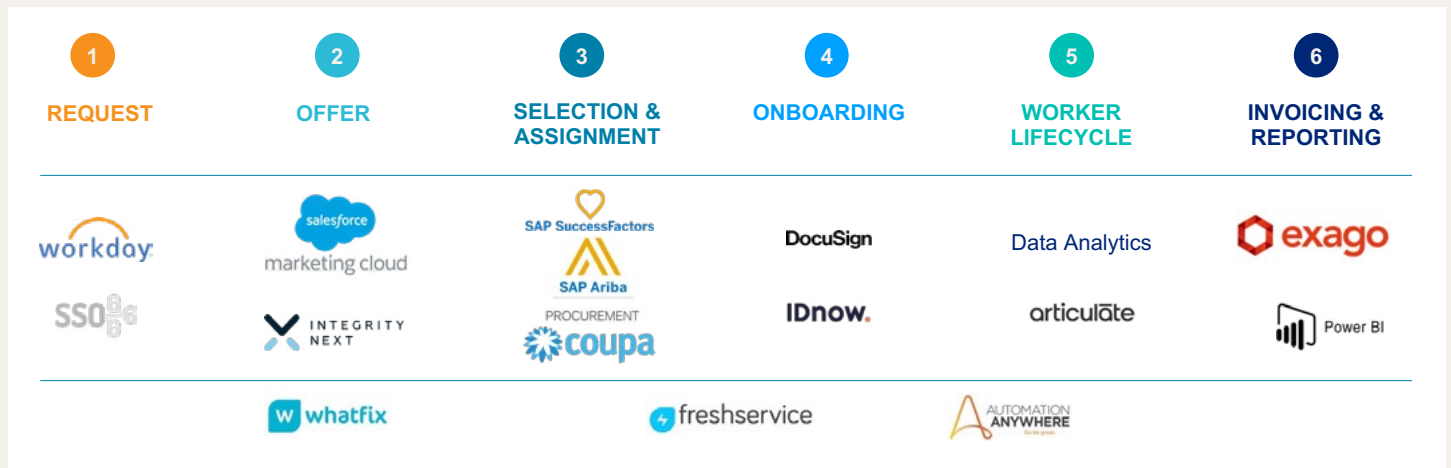

## WITH US YOU ARE IN SAFE HANDS

- 3 Story Software is certified according to ISO 27002 and SOC 2 type I & II
- Data centre in Europe
- Ensuring the EU GDPR

## AVOID MEDIA DISRUPTIONS IN PROCUREMENT

The entire procurement and management process of your external personnel runs smoothly thanks to a smart connection of all relevant systems

Trust our technological expertise and automate your end-to-end process with us!
